108   "message": "Test Case ID: TC_PC_001\n\nTitle: Successful payment using a valid debit card within daily limit.\n\nPreconditions: User is logged in; debit card is active, not expired, and has sufficient balance; daily transaction limit not exceeded.\n\nSteps: \n\n1. Navigate to the payment page. \n\n2. Select 'Debit Card' as the payment method. \n\n3. Enter valid card number, expiry date, CVV, and cardholder name. \n\n4. Enter a payment amount that is below the daily limit and within available balance. \n\n5. Submit the payment. \n\nExpected Result: Payment is processed successfully, a confirmation screen with transaction ID is displayed, and the account balance is reduced accordingly. \n\nTest Case ID: TC_PC_002\n\nTitle: Payment declined due to insufficient funds on debit card.\n\nPreconditions: User is logged in; debit card is active and not expired; account balance is lower than the intended payment amount. \n\nSteps: \n\n1. Navigate to the payment page. \n\n2. Choose 'Debit Card' as the payment method. \n\n3. Enter valid card details. \n\n4. Enter a payment amount greater than the available balance. \n\n5. Submit the payment. \n\nExpected Result: Payment is declined; an error message 'Insufficient funds' is shown; no funds are deducted and the transaction is not recorded. \n\nTest Case ID: TC_PC_003\n\nTitle: Payment attempt with an expired credit card.\n\nPreconditions: User is logged in; credit card is active but the expiry date is in the past. \n\nSteps: \n\n1. Navigate to the payment page. \n\n2. Select 'Credit Card' as the payment method. \n\n3. Enter the expired card number, past expiry date, CVV, and cardholder name. \n\n4. Enter any payment amount. \n\n5. Submit the payment. \n\nExpected Result: Payment is rejected; an error message 'Card expired' is displayed; no transaction is created. \n\nTest Case ID: TC_PC_004\n\nTitle: Validation error for card number failing Luhn check.\n\nPreconditions: User is logged in; card details are otherwise correct except the card number does not pass Luhn algorithm. \n\nSteps: \n\n1. Navigate to the payment page. \n\n2. Choose either 'Debit Card' or 'Credit Card' as the payment method. \n\n3. Enter an invalid card number that fails Luhn validation, along with correct expiry date, CVV, and name. \n\n4. Enter a valid payment amount. \n\n5. Attempt to submit the payment. \n\nExpected Result: The system blocks submission and displays a validation error 'Invalid card number'; payment is not processed. \n\nTest Case ID: TC_PC_005\n\nTitle: Payment failure due to payment gateway timeout.\n\nPreconditions: User is logged in; valid debit or credit card details; network connectivity is stable for the client but the payment gateway is simulated to timeout. \n\nSteps: \n\n1. Navigate to the payment page. \n\n2. Select the desired card type and enter valid card information. \n\n3. Enter a payment amount within limits. \n\n4. Submit the payment. \n\n5. Simulate a gateway timeout (e.g., by disabling the gateway service). \n\nExpected Result: The system shows a timeout error message 'Payment could not be processed, please try again later'; no funds are deducted and the transaction is not recorded.",
